

Navy Region Southwest

Naval Air Weapons Station China Lake

Solar Power Procurement Industry Forum

NAVFAC Southwest will be hosting an Industry Forum to focus on the acquisition of solar power on Naval Air Weapons Station (NAWS) China Lake. The intent of the Forum is to continue formulation of the Navy's strategy to develop renewable resources to substantially meet the electricity requirements at NAWS, specifically related to solar power procurement. The Navy previously collected market research information related to photovoltaic system development through a Request for Interest process during May 2007. This Forum is the next step towards the Navy intent to develop a renewable resource on Navy land at NAWS. The Forum will allow industry to receive input on the utilities requirements at NAWS as well as visit potential site(s) where solar power resources may be developed. The Forum will also serve to inform industry of the Department of the Navy's acquisition process, contractual and legal parameters, business and program goals, and the Navy's strategic and economic vision for Renewable Energy.

The goal of the Forum is to solicit feedback from industry, government, and subject matter experts so that the Navy can formulate a specific strategy for Solar Power Procurement at NAWS.

Photovoltaic

Discussion topics will include the present state of utilities acquisition at NAWS, a summary of the annual load requirements, and the Navy's concept for developing solar power resources.

The Forum presents an opportunity for industry participants to grasp an understanding of the Navy's requirements and solar power development opportunity and partnering potential at NAWS.

Please visit our NAVFAC website, located at
<https://portal.navfac.navy.mil/navfacsw> (go to <Quick Links>)

Please register at this website for further information and Forum attendance.

The Forum is scheduled for 05 December, 2007 (0830-1630) at NAWS China Lake, which is located next to Ridgecrest, CA. The exact location on NAWS and access procedures will be published on the website listed above.

For questions regarding the Forum please contact Ms. Rea Carlos at (619) 532-1103, or email: rea.carlos@navy.mil, or Mr. Calvin Kawamura at (619) 532-1813 or email: calvin.kawamura@navy.mil.
